## How To Prepare For A Rodent Treatment

### **Exterior**

It is recommended that tamper proof stations are used for durability and less chance of being tampered with by children and pets. These come in sizes fit for mice and rats. Cardboard boxes are available for mice and rats though offer less durability.

Please ensure that kids are taught not to touch the bait stations.

Make sure that pets are secured while treatment is being performed.

### **Interior**

It is recommended that tamper proof stations are used for durability and less chance of being tampered with by children and pets. These come in sizes fit for mice and rats. Cardboard boxes are available for mice and rats though offer less durability.

Please ensure that kids are taught not to touch the bait stations.

Make sure that pets are secured while treatment is being performed.

Be aware that baits may be placed at back of Cupboards, Refrigerators, and Washing machines also storage areas.
